CARD

Simplicity at its best

The Time Clock

The Easy Clocking® EC50 is our proximity card Edition Employee Time and Attendance system designed for small to large sized businesses. With the Easy Clocking state-of-the-art RFID technology you can track employee's time and attendance with the swipe of a proximity card. The Easy Clocking® EC50 verifies an employees identity based on the proximity card assigned. State of the art technological advances in RFID technology have now made this surprisingly affordable and popular. The Easy Clocking EC50 proximity time clock scans the card in under 1 second; this in turn will make clocking in and out much faster for employees and at the same time saving companies time and money by paying employees for the exact time they work. Companies will also reduce costly payroll and data entry errors caused by the old time card system.
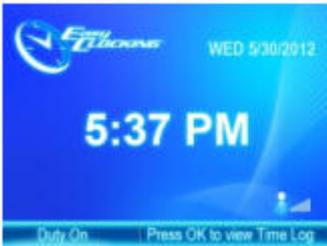

RFID Proximity Card Technology

Tracking employee time and attendance is fast and simple with the Easy Clocking EC50 proximity card time clock. Each employee is provided with a unique RFID badge. To clock in or out, the employee passes the RFID badge near the time clock, and the RFID reader records the time of entry or exit. Data is downloaded from the clock to the administrator on a scheduled or periodic basis, automatically delivering accurate time and attendance records.

Large Color LCD Screen

The large easy to read full color LCD screen displays the current time, when clocking in or out the screen displays the employee name and the large LED bar light provides employees with a instant good (green) or bad (red) punch indications with voice prompt.
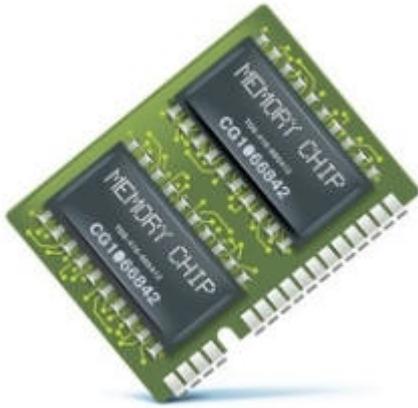

Home Screen   Verified Screen   Not Authorized Screen

Standalone Operation

Unlike most of the time clocks sold today the Easy Clocking EC50 is a wall mounted standalone device and does not require a computer to collect employee time. It stores all employee information in it's built-in memory and up to 100,000 employee transactions can be stored in the EC50 time clock. An internal battery ensures punches stored in the terminal are retained even in the event of a power outage.

Versatile Communication Interface

The Easy Clocking EC50 is equipped with multiple communication ports to allow the easy download and upload of records and data.

| Ethernet Network | USB Cable | USB Flash* | Wiegand 24/36 | Direct Door Lock Output |

Features & Benefits

- With an automated time attendance system you Pay your Employees for the Exact Time They Work.
- Buy With Confidence, Over 30,000 Employee Time Clocks Sold Worldwide
- Does Not Need a Computer to Operate, Stores 100,000 Transactions in it's Built-in Memory
- Download Employee Records to a PC with a USB Memory Flash
- Knowledgeable Sales and Technical Support Staff Here to Help You

- Connects Directly To any Computer through the USB Cable Provided or Ethernet cable (not provided)
- Reduces Costly Payroll & Data Entry Errors and Minimizes Processing Time
- Avoids The Hassle of Auditing Paper Based Employee Time Cards
- Administrator Feature to Edit, Add or Delete Records
- Employee Authentication Methods: RFID or Pin Number
